COSMETICS APPLICATORS

Delivering complex cosmetic formulations more easily with porous polymers

Big particle flow-through with no clogs or leaks

- 100% porous structure delivers product cleanly through the complete applicator - not just a through-hole
- Complex cosmetic formulations with big color particles and glitter can easily pass through

Customizable 3D shapes to differentiate your product

- Sintered technology enables customer specific logos or branding
- Hollow or solid shapes available
- Material engineers develop the perfect solution for your design

Soft and smooth for easy application

- New Nubiform® elastomeric material for color cosmetics gives the applicator a smooth foam-like feel, but with the durability of a 100% sintered product
- Skin-friendly polyurethan foam with hypoallergenic options
- Specific applicators available for oils and perfumes

Perfect for any complex liquid formulation and surface

- Eyes
- Hair
- Lips
- Nails
- Skin

Material science experts with high-volume global manufacturing capability

- 60 years of expertise in global manufacturing
- All eight global manufacturing sites are ISO Certified

Sustainability: Talk to us about sustainable options using recycled plastic

COSMETIC APPLICATOR PRODUCTS

Polyurethane Foam Applicators

Formulation types: Liquid and powder cosmetics for skin

- Ultra-soft foundation application
- Customized shapes & colors
- Hygienic: Latex-free and hypoallergenic
- Multiple additives possible
- Bio-based options

Nubiform® Elastomeric Applicators

Formulation types: Liquid color cosmetics for lips and eyes

- Flow-through applicator for color cosmetic formulations
- Suitable for big pigments in color, glitter or pearl
- Porous structure offers uniform delivery
- Soft and bouncy
- Customizable shapes and colors

Glide Applicators

Formulation types: Oils and perfumes for skin

- Flow-through technology for flawless application
- Customizable 3D shapes
- Adjustable pore sizes
- Anti-microbial protection
- Choice of colors, textures and feels

Facial Stamp Applicators

Formulation types: Color liquid cosmetics for skin, eyes and eyebrows

- Capillary action delivers ink to skin
- Cat eye stamps
- Eyebrow stamps
- Customizable facial icons

Hair and Nail Applicators

Formulation types: Topical liquid treatments for hair and nails

- Consistent release of formula
- Design flexibility with 3D shapes and customizable liquid release rate
- Use with all liquid hair products including serum, oil, colorings, and conditioning treatments
- Sintered nail care applicators can be used for care and corrector pens
