

POREX® Self-Sealing Medium Pore Size Cylinder

6870

Parameters	Value
Technology	Sintered
Material	Polyethylene (PE)
Property	Self-Sealing
Shape	Cylinder
Diameter	.25 ± .007 in / 6.35 mm
Length	.562 ± .0315 in / 14.26 ± .8 mm
Pore Size	10 - 35 µm
Pore Volume	33 - 60 %

Description:

Self-sealing cylinder for medium pore size applications in the range of 10-35µm. Typically used for venting. Each sample bag contains approximately 40 samples.

Final tolerances for commercial production will be supplied and agreed upon with a *Mutually Understood and Acceptable Specification Document*.

Disclaimer

This standard sample is for evaluation of form, fit, and function to determine product specification requirements for custom products. Please reference the values in our data sheet for specification guidelines of standard products. In Vitro Diagnostic (IVD), medical-surgical and pharmaceutical samples are for investigational use only and subject to specific application, test condition and regulatory requirements.
