PRODUCT CATALOG

CPAP | OXYGEN | VENTILATOR
SUCTION | NEBULIZER

RESPIRATORY PRODUCTS

AG Industries provides a broad range of respiratory replacement products for distributors and homecare providers. Our portfolio includes filters, masks, tubing, cannulas, connectors, canisters, and accessories for CPAP, oxygen, ventilator, suction, and nebulizer systems, supporting both adult and pediatric respiratory care.

AG Industries operates an FDA-registered facility and is certified to ISO 13485:2016.

For over 40 years, AG Industries has been providing comprehensive and innovative respiratory solutions

While manufacturing and supplying a great variety of respiratory products, AG Industries specializes in CPAP, Oxygen, Suction, Ventilator & Nebulizer filters and replacement accessories. Our in-house design, engineering and manufacturing ensures AG controls each step of production and delivery of quality products to our customers. When it comes to delivering quality, our well stocked facility holds the key to all our client's respiratory needs.

AG Industries was founded in 1982 as a DME distributor with only 3 employees. As AG began to grow, our specialty quickly became respiratory equipment and the supplies for those systems. As respiratory products became the center of AG, we recognized the constant demand of the systems for disposable supplies, and the red tape that often accompanied their distribution. In order to address those issues AG began to cut, assemble, and distribute basic filters to healthcare providers around the country. Along with growing manufacturing capabilities, AG's innovation grew to include HEPA & custom filters, product design, and a larger focus on fluid filtration including gasses and liquids.

For over 40 years, AG has grown to become a vertically integrated company with more than 100 employees and support, with a worldwide presence.
